

# SOAP BAD...CHEM DRY GOOD!

## Why is it that a new carpet stays clean so long?

*No Dalmatians lost their spots during the making of this ad!*

Because, when it's fresh from the store there is **nothing** in it for the dirt to stick to. By keeping things out of your carpet that collect dirt (soap, sugar, oil from pet fur, etc.) your vacuum becomes a stronger ally in the battle against dirt. ChemDry's "The Natural" removes residues that collect dirt and replaces them with residues made from citrus tree peels which do not.

- Residential & Commercial Rates!
- Main cleaner (carbonic acid) listed on FDA Gras list (Generally Recognized as Safe).
- Average dry time 1-2 hours.
- No sticky residues.
- Preserves your carpet instead of soaking and rotting.
- **URINE REMOVAL SPECIALISTS**
- Chem Dry's Pet Urine Removal Treatment vaporizes urine instead of spreading it out w/water.
